

MYCOTOX-PALOP

Multi-actor partnership for the risk assessment of mycotoxins along the food chain in African Portuguese-speaking countries (PALOP)

OBJECTIVES

Increase awareness on food security problems due to fungal and mycotoxin contamination of crops in Angola and Mozambique

Identify social, economic and public health impacts resulting from mycotoxin contamination

Identify and characterize key risk factors in terms of food Staples and production strategies

Implement intervention strategies to reduce human exposure to mycotoxins

Promote sustainable and long-term impacts through education and training at popular and technical levels

MYCOTOX-PALOP

INTERVENTION COUNTRIES

ANGOLA

MOZAMBIQUE

STAPLES AND MYCOTOXINS

Corn (AFLA, FUM, ZEN)

Peanut (AFLA)

Bean (AFLA)

Cassava (AFLA)

Rice (AFLA)
